#### THE STOCK MARKET.

NEW YORK, Nov. 10 .- The net results of the trading on the stock exchange was in consequential, save in a very few instan-ces, barely a dozen stocks showing a change of over 1 per cent, compared with the closing sales of yesterday. New En-gland was the leader, both in point of ac-tivity and as to the width of fluctuations. An unfavorable report circulated against the road at the opening caused the stock to drop 3% per cent. Subsequently a slight recovery was made, but the close was heavy at a decline for the day of 3 per cent. The decrease in the carnings of St. cent. The decrease in the earnings of St. Paul caused the bears to strike at that stock, and it closed with a loss of % per cent. The general market was barely steady in the morning, but became firm during the afternoon, finally closing strong and 14 to 14 per cent higher.

Our little boy broke out on his head with a bad form of eczema, when he was four months old. We tried three doctors, but they did not help him. We then used your three CUTICURA REMIDIES, and after using them eleven weeks exactly according to directions, he began to steadily improve, and after the use of them for seven months his head was entirely well. When we began using it his head was a solid sore from the crown to his eyebrows. It was also all over his ears, most of his face, and small places on different parts of his bedy. There were sixteen weeks that we had to keep his hands to keep his fands and hold them when he was taken up; and had to keep mittens tied on his hands to keep his fands to keep his fands to keep his hands to keep his fands out of the sores, as he would scratch if he could fin any way get his hands loose. Notes

WASHINGTON, Nov. 10 - A letter from Secretary Gresham to the president, dated the 18th ultimo, concerning Hawaiiar, affairs, has been given out for publication. In it he takes the ground that the marines landed from the United States steamer Boston at the time of the revolu-tion were not landed to protect American life and property, but to aid in overthrowing the acting government. Their very presence, he says, inspired coercive measures against it. The provisional govern-ment was established by the action of the American minister and by the presence of the troops landed from the Boston, and its continued existence is due to a belief of the Hawaiian Islanders that if they made an

effort to overthrow it they would encounter the armed forces of the United States. The letter concludes as follows:

"The earnest appeals to the American minister for military protection by the officers, of the provisional government, after it had been organized, show the utter absurdity of the claim that it, was estable. after it had been organized, show the utter absurdity of the claim that it was established by a successful revolution of the people. These appeals were a confession, by the men who made them, of their weakness and timidity. Courageous men, conscious of the strength and justice of their cause, do not thus act. It is not now claimed that a majority of the people have not the right to vote under the constitution of 1887; that they ever favored the ex-De France, who has been held here on the charge of complicity in the noted Perrin kidnaping case was released this afternoon. "A careful consideration of the facts will, I think, convince you that the treaty which was withdrawn from the senate for which was withdrawn from the senate for further consideration should not be resubmitted for its action thereon. Should not a great wrong done to a feeble but independent state by the abuse of the authority of the United States be undone by restoring the legitimate government? Anything short of that will not, I respectfully submit, satisfy the demands of justice. Can the United States consistent that other nations shall respect to the state of the control of the contr iy insist that other nations shall respect the independence of Hawaii while not re-specting it themselves? THE LONG PENSION CASE.

WASHINGTON, Nov. 10 -- Commissioner of Pensions Lochren has filed his answer in the mandsmus proceedings instituted by Judge Charles E. Long of Michigan. The latter was receiving a pension of \$72 per month, which Commissioner Lochren suspended on the ground that Judge Long as not entitled to a total disability pen-

ong was legally placed on the pension oils, but denies that the certificate inreasing his pension to \$12 per month was regular or lawful. In defending the right of the commissioner to suspend pensions he asserts that it has been the practice since 1819, when John C. Calhoun, as secsince 1819, when John C. Calhoun, as sectory of war (in charge of pensions), exercised the right; also, that Secretary Chandler suspended pensions in Pennsylvania and New Jersey in 1875 on account of irregularities of claim agents, and that the same year a standing order was adopted regulating suspensions, reductions and dramping from the rolls, and that such actual transactions, and much more in the tone of the same year a standing order was adopted regulating suspensions, reductions and definitely out of the way, and the chance of disturbing action in other respects being of disturbing action in other respects being

THE TARIFF REFORMERS. WASHINGTON, Nov. 10 .- It is difficult to predict what effect the recent election will have on the tariff bill now being formulated by the Democratic majority of the ways and means committee, but Mr. Wilson rather confidently predicts that the passage of the measure now being prepared by himself and his colleagues will be the only needful thing to restore public confidence and replace the Democratic party on the pedestal of rollifical supremacy. But the opinion of Mr. Wilson is not shared by all the other prominent men in his party. In fact, there are indications that the result of Tuesday's elections will impel several Democratic leaders of national reputation to connect the party has been so strongly urging. It is natural therefore that the desire for a Democratic cancus should be expressed by the malcontents, and it is this desire that is just now creating some commontion in the ranks of the radical tariff reformers. A request for a caucus has been made by so eminent a leader as Judge Culberson, chairman of the judiciary committee, and even Congressman Biand of Missouri is credited with a determination to fight the committee's recommendations if they place wool, coal, lumber, iron ore and sait on the free list, as is generally believed that they will.

THE CORN YIELD. WASHINGTON, Nov. 10.—The November returns to the department of agriculture of the rates of yield per acre make the average for corn 22.6 bushels. She considers United States Senator John Martin unworthy of the support of the People's party. She says that the whole crowd must be turned down. She thinks fusion is dead in Kansas.

If the ratio of gains and losses in the election returns aiready received be mainrained in the raturas yet to come the Republican gain over 1892 will be 25,000 and the populist and Democratic loss 74,000.

The rescued mariners are Antonio Crimen, Llogi Peris and Penro Nagolez, a boy, who were picked up in mid-oc-an, entirely nude, after undergoing sufferings that almost made them crazy. They had seen seven of their comrades perish. The remaining two were taken off the vessel by the steamship Lampas, and landed at Galveston, Oct 10. The Murga was caught in a terrible northeast hurricane on Oct. 9. The crew took to the rigging, where they firmly lashed themselves. The provisions were washed overboard with the water casks, leaving nothing by which the men could quench their thirst or satisfy their hunger. The cargo swelled and burst the decks as under. Ten of the crew then took to the long boat, while two of the men remained on the bark in preference to going on the overcrowded boat, and were thereby saved.

The returns relative to potatoes give the estimated average yield per acre for the whole country at 72.2 bushels.

The consolidated returns from the to-bacco-growing states make the estimated yield per acre 695.3 pounds, against 682 pounds in 1892.

The average yield of hay is reported at 3.2 tons per acre.

The average yield of buckwheat per acre is given as 14.7 bushels, against 14.1 in 1893 and 15.3 in 1891.

MUSKOGEE, I. T., Nov. 10.—The Creek council has adjourned, and during the last day of its life it passed more bills than during the entire period before. INDIAN TERRITORY MINES. WASHINGTON, Nov. 10-All of the mines in the Indian Territory, with one excep-tion, are in good shape. This is the con-clusion reached by United States Mining Inspector L. W. Bryan of the Indian Terciusion reacced by United States Mining Inspector L. W. Bryan of the Indian Territory, in his monthly report received at the interior department. The exception is the Hartshorne No. 1, where the method of shooting the coal is deemed defective. There were four accidents in the Territory during the mouth, but none were fatal. Efforts are being made by the inspector to have "shot-firers" placed in mine No. 2 at Hartshorne for safety purposes. In this mine 400 men are employed, and each man lights his own "shot" in blasting. This is deemed dangerous, and the inspector says that in case of an explosion that loss of life would be terrible. The mine-owners object to the employment of "shot-firers," who are experts, whose duties are to arrange for the firing of the blasts. Their employment would refleve the mexperienced men of the work and reduce the danger to the minimum.

"If we can succeed in getting shot-firers in all of the mines," says the inspector, "there will be no accidents to injure more than one or two persons at a time. As it is, the lack of employment of these experts results in accidents in which large numbers of miners are killed."
